LANCO
INTEGRATED

Empowering Global Assembly

Our Experience

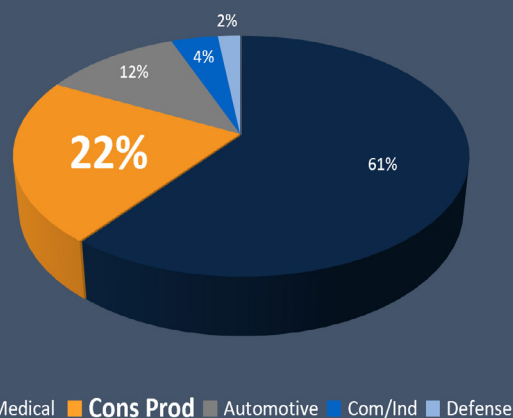

Lanco Integrated has been a global leader in the development of automated assembly systems for over 40 years. Supporting OEM's, suppliers and contract manufacturers; Lanco "Empowers Global Assembly."

Lanco is acutely aware of the importance of **time-to-market** in the **Consumer Products** sector and the need to produce cosmetically perfect parts. With years of experience, Lanco has perfected an equipment design and delivery process that is built around your needs, expectations and ensures your success.

Lanco stands with its customers. From conception through commissioning and beyond, we will deliver a turnkey system that achieves your production needs. With global service and after-delivery support, Lanco's organization will support you with ongoing OEE optimization programs.

2020 YTD Lanco Global Sales

Over 8000 machines delivered worldwide.

Our Development Process

Concept

Need a proof of concept or prototyping services? Not a problem. Lanco is here to support your objectives, while incorporating your ideas and vision into a real production solution. Through joint collaboration, we will achieve your goals.

Design

Lanco Integrated's global design centers will find the ideal match between the product and process, achieving the highest possible production yield and quality standards.

Build

From part conveyance to integrated process technologies and testing capabilities, Lanco Integrated has the customized solution for your consumer product application.

Consumer Products

Manufacturing Experience Examples

Electronics

- Ear Buds
- Keyboard Switches
- Switch Gear
- Dials & Indicators
- Cell Phone Housing

Household

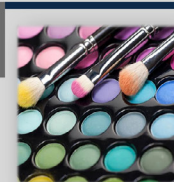

- Plumbing Fixtures
- Window Frames
- Trigger Pumps
- Door Locks

Hygiene

- Cosmetics
- Baby wipes
- Hand Sanitizer Pumps
- Soap Dispensers

Workplace

- Tools
- Protective Eyewear
- Office Supplies
- Face Masks
- Hearing Protection

"Through collaboration and teamwork we succeed together; developing systems that enable your success."

Your Needs Define The Technology

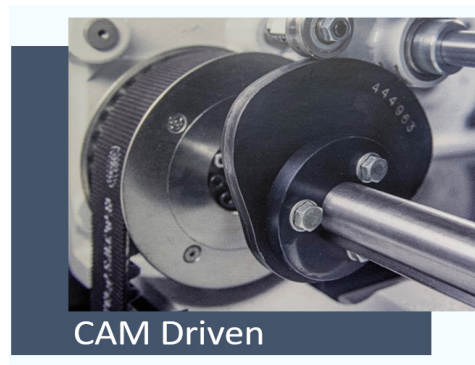

Determining the right assembly technology for your specific need is a factor of product size, geometry, cycle time and specific processes to be integrated.

Whether CAM driven or Power and Free, Lanco Integrated designs and fabricates custom assembly lines. Our collaborative process ensures each system is tailored to your specific needs and specifications.

Lanco knows the many factors companies face when considering automation. Our technologies will increase quality, reduce cost and keep you competitive.
